

The **QUICK-LOCK Tankbag** system can be used with all types of tanks regardless of material or shape (no annoying straps or magnets).
The **Tankbag** can easily be attached and removed in seconds.

QUICK-LOCK Top Ring 12V

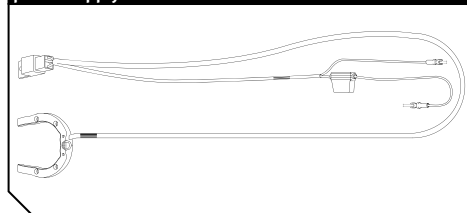

QUICK-LOCK Socket 12V

The new **Tank Ring System** uses the power supply from the bike's electrical system. You can use and charge external electronic equipment such as GPS-Systems, mobile phones or video cameras. Further useful features are map illumination, internal tankbag lights and universal outlets.

Notes: Existing **QUICK-LOCK Adapter** cannot be modified afterwards, but you can use your **QUICK-LOCK Tankbag** with the new technology using the existing holes.

power supply

Technical description

The voltage will be transferred by two gold plated contacts in the **tankbag**. A protection circuit avoids a short when the tankbag is detached.

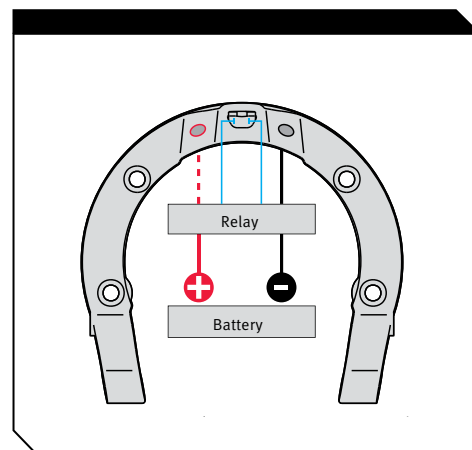

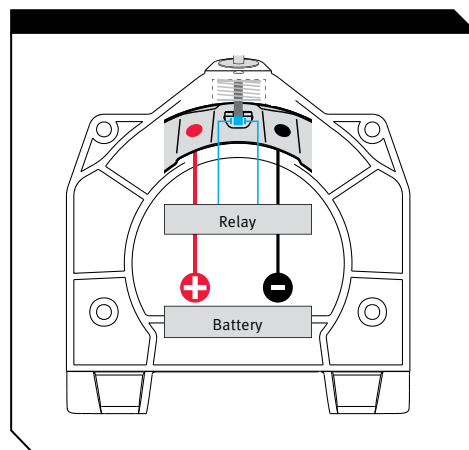

The contacts in the **top-ring** are assembled with springs to guarantee constant contact when vibrations occur.

The maximum electric current is secured by an additional fuse.

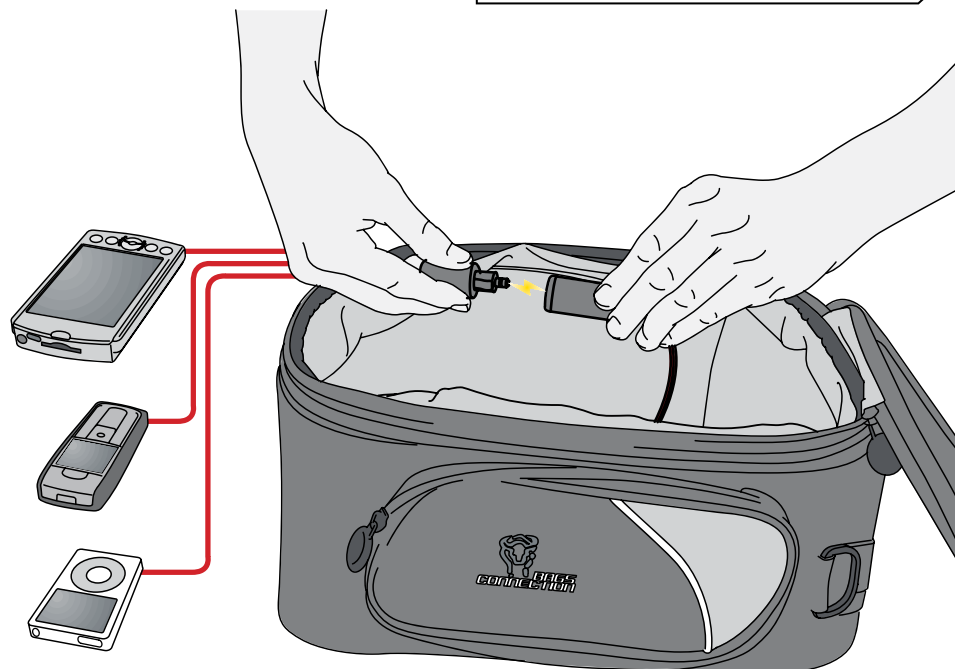

When the **top-ring (tankbag)** is attached, the locking pin activates a relay and the 12 V power supply is on.

When the **tankbag** is detached the relay disconnects the power supply and the contacts are without power.

contacts in the tank bag

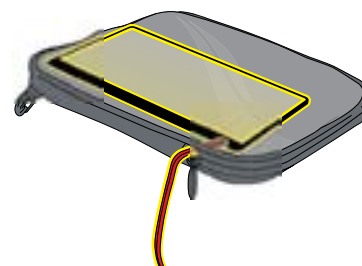

Complete pre-cast dual power supply outlet with one 21mm Standard-Euro-Norm-Connector (cigarette lighter) and one BSK 12 outlet. Cable connectors (6,3mm) for the electric tankring are included.

Connection: 12 V power supply

The universal Map Light works with a new LED-technology.
A special impact resistant Plexiglas is treated to evenly diffuse the light across the entire surface allowing the map to easily be read at night.

LED'S make it possible to illuminate the interior of your Tankbag, making it easy to search through your tankbag in the dark. They are mounted in a protective case. Comes with a Velcro strip to attach to the inside of the bag

QUICK-LOCK Tankring Accessories / RAM-Mount

Shock Absorbent Base: Four rubber dampers are used to absorb vibrations. The Base is also available without rubber dampers. See TRT.00.475.225C in table below.

The new shock-absorbent base provides a fast, safe and simple attachment for your electronic equipment. The base uses the QUICK-LOCK Socket (see page 18-19) to attach to nearly all gas tanks. The base is fully compatible with all RAM-Mount Components. With RAM-Mount Components you can mount your choice of video camera, digi-cam, or GPS to your Tank with just one click.

RAM Camera Mount

Use standard 1/4-20 thread to attach cameras.

QUICK-LOCK Engage Sport

The streamlined form of the Engage sport is perfectly suited for sport and supersport motorcycles. The bottom profile of the tankbag works well with long flat tanks (typical of sport bikes). Not recommended for Enduro tanks or tanks that slope sharply down towards the driver. With the dimensions of 370 x 320 x 190 mm, it offers a maximum volume of 22 liters. Comes with 140 x the 270 mm large map window as well as 2 side compartments, one of which is detachable and can be used as a hip-pack.

Includes:
Tankbag
rain cover
shoulder strap
QUICK LOCK upper ring

Expander function

Volume: 15L > Expanded 22L

Interior

The inside of the cover contains two pockets and pen holders.

Tankbag Sport

The tankbag is designed for sport- and sport-touring bikes, so the rider can get closer to the tank for faster riding. Secure grip on the vehicle due to extremely strong magnets. For PVC tanks we offer a strap-holding system or tank cover base. Volume c. 15 lit., expanding to c. 22 lit.

Includes:
rain cover
side bags (one detachable as hip-pack)
shoulder strap
4 straps for rear-seat fitting
scratch resistant film

Access to the main pocket

Expander function

full volume c. 22 lit.

Interior with Mobile Pocket

Mapholder

The “Shorty” is nearly identical to the Engage. Here however, well-known and proven Rare-Earth magnets are used. Equipped with all the features and volume of the Engage. The tankbag is best suited for Enduro tanks or tanks which slope down sharply towards the driver.
Some examples: V-Strom, R1150GS, Z 750/1000, Fazer, CB 500/600...
Available accessories: Map holder

	Notes	Part Number
Shorty	Magnet Tankbags	BCK.TR5081
Mapholder	for Tankbags	BCK.MHE5111

Mobile Telephone Pocket

Sholder Strap Included

The Tankbag “Trip” is perfect for your day-to-day travels. Mobile phone, wallet and other small items are easily stowed away in it. The bag has a clear window for your phone, so you can check the time and see who might be calling. Contents approx. 3.5 liter.

	Notes	Part Number
Trip	Magnet Tankbag	BCK.TT4071
Mapholder	for Tankbag	BCK.MHE5111

Tankbag Tour

Spacious two-piece touring tankbag. Each compartment can be independently fitted to the base, which can be used alone as map holder. The expansion zipper on the top part can increase the packing capacity. In addition to the standard magnetic base, the alternative fittings are the strap holding system and the tank cover base.

Maximum volume is c. 40 lit.

Includes:
rain cover
side bags (one detachable as hip-pack)
shoulder strap
4 straps for rear-seat fitting
scratch resistant film.

Two-parts

both parts may be used separately

rear seat fitting

	Notes	Part Number
Tour	Magnet Tankbag	BCK.TR4051
Tour	Strap-On Tankbag	BCK.TR4051RH

Tankbag Trial

Because of its curved form the "Trial" is perfect for use on the tanks of big off-road and touring bikes such as R 1150 GS, Varadero ... The long side flaps have the function of tightly securing the bag against sliding. An expansion zipper is integrated to increase the volume to a maximum capacity of about 28 lit. Magnetic base can be used alone as a map holder. Alternatively we offer a strap holding system or a tank cover base to fit the "Trial". Detachable hip-pack!

Includes:
rain cover
shoulder strap
scratch resistant film
